Mini Project

G Rithwik Surya

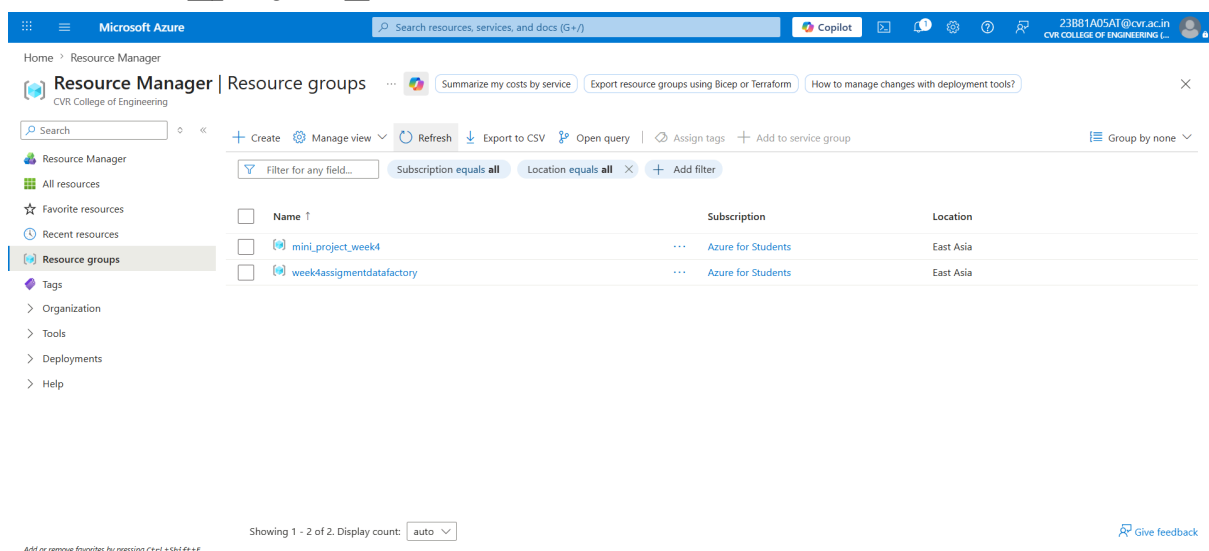

Problem Statement:

Build a complete pipeline that reads a CSV file from Blob Storage and processes it using Azure Data Factory.

Requirements:

- Source: CSV file in Blob
- Use: Linked Service + Dataset + Pipeline
- Process: Copy Data + Metadata check
- Destination: New file/location

1. Created a resource group with a name of mini_project_week4

2. Created a storage account as a blob storage

Microsoft Azure

Search resources, services, and docs (G+/)
